

Puffin Academy

Dear

As you may be aware, the school has Home Access licences for EducationCity, which allow your child to access the great EducationCity resource at home using their individual logins. Access to EducationCity is available via your personal computer but also extends to mobile devices and tablets if you use the free browser 'Puffin Academy'.

Puffin Academy is a 'Mobile Flash Browser' which always enforces site-filtering by only allowing whitelisted educational websites to be accessed.

The key features of Puffin Academy are outlined below:

- Free of charge to all users and educational content providers.
- For purely educational websites only; educational content providers must apply for approval for their resource to showcase on this browser and once approved, their content is available to all users.
- Puffin Academy is 500% faster than Safari and Chrome and also supports Flash content and videos.

To find out more information about Puffin Academy, please visit <http://www.puffinbrowser.com>.

To install the Puffin Academy browser, please go to <http://www.puffinbrowser.com/download/>.

Once on the site, scroll down and select the 'Puffin Academy' version, then install the Puffin Academy browser. Once installed, go to the Puffin Academy App where you'll find an EducationCity tile. Click on this and you'll be directed to our standard login page, from which you can interact with EducationCity as per usual.

If you have any questions regarding accessing EducationCity via the Puffin Academy browser, please do not hesitate to contact EducationCity directly by calling 01572 725080. Should you have any other queries, please contact us at the school about them.

Kind regards,
